| Deze prestatieverklaring betreft menggranulaat 0/31,5 voor toepassing in verhardingslagen van steenmengsel. Menggranulaat ontstaat bij de bewerking van beton- en metselwerkpuin in een bewerkingsinstallatie. De bewerking bestaat uit breken en zeven.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                               |                                                                                                                                 |                                |                                                                                   |                                      |     |                                                                  |                           |     |                                                                                                                                                               |                                      |  |                                                                                                                                          |                      |  |                          |                  |  |       |      |  |     |       |  |    |       |  |    |       |  |      |       |  |      |       |  |        |       |  |       |        |  |         |     |
